Protect Data
Protecting you where work happens

The Best Defense is a Good Offense

Effective information governance is a business-critical issue for organizations of all sizes and across a wide variety of industries. As the massive volumes of data being created converge with increasingly stringent restrictions on how information must be maintained, the data management quandary is fast approaching a boiling point; and organizations are struggling to keep pace. From enforcing complex regulatory policies and reducing legal exposure to ensuring efficient data retrieval and safeguarding employee productivity, companies need solutions that can tame complexity, minimize risk, reduce costs, and decrease the burden on already over-taxed resources.

The Mimecast Cloud Archive solution is a multi-purpose platform that serves the needs of legal, compliance, and IT leaders. Mimecast helps companies protect their people, communications, and data by providing comprehensive, cloud-based security and compliance solutions that mitigate risk and reduce the cost and complexity of creating a cyber-resilient organization. A seven-time Gartner Magic Quadrant leader for Enterprise Information Archiving, the solution allows you to:

- **Ensure Compliance**
  Mimecast Cloud Archive removes the guess work from compliance by automating the enforcement of customer-defined retention policies. Customers can reduce the risk, cost, and complexity of navigating evolving regulatory requirements, while controlling audit readiness.

- **Simplify e-Discovery**
  Mimecast Cloud Archive delivers the industry's fastest e-discovery search, allowing customers to search millions of records in seconds. The solution's e-discovery collection, legal hold and review capabilities, and self-service tools for legal and compliance teams dramatically streamline case management, which decreases the burden on IT and provides greater visibility and control over Early Case Assessments (ECA) and third-party costs.

- **Improve Productivity and Insights**
  Mimecast Cloud Archive allows organizations to turn information into insights by putting data at users' fingertips. Intuitive desktop tools and mobile applications mean employees no longer waste hours searching for information and can instead spend their time analyzing and acting on it.

Top 3 challenges solved by deploying Mimecast Archiving

- Delivered better access to information
- Simplified e-discovery & compliance
- Integrated backup & archiving

Mimecast is the most recommended Archive software on the market

- 93% of Mimecast Archive customers would recommend it to a peer
- 61% of mimecast Customers achieve ROI in less than 18months
- 100% of Mimecast data archiving clients surveyed are planning to renew services

Mimecast Cloud Archive

Mimecast Cloud Archive is a 7x Gartner Magic Quadrant-leading solution trusted by over 17,000 organizations globally to make their data compliant, easily searchable, and secure, providing capabilities in the following core areas:

Enterprise Information Archiving

Organizations are struggling with accelerating growth in email and other collaboration tools and the associated burdens of protecting and retaining it for e-discovery, compliance, and resilience. Mimecast Cloud Archive allows organizations to easily manage data growth without the headaches of maintaining an in-house archive.

Key capabilities include:

- Bottomless, immutable archive with granular retention up to 99 years

- Support for a wide range of data types, including email, Microsoft Teams, and third-party applications

- Total cost of ownership that's 40-60% less than legacy solutions

- Simplified maintenance and administration with robust e-discovery for reduced litigation risk

- Fast, self-service access for end users via Mimecast for Outlook, web-based Mimecast Personal Portal, and mobile app.

Compliance

Mimecast's compliance and surveillance capabilities dramatically simplify the enforcement of compliance standards by automating the enforcement of all company-configured policies and allowing legal and compliance teams to ensure information confidently and consistently is managed in accordance with internal and regulatory-driven requirements.

Key capabilities include:

- Self-service administration that allows legal and compliance teams to set and modify retention and expiry standards

- Encrypted, secure storage in multiple geographically-dispersed data centers with triplicate copies for built-in redundancy and zero RPO and RTO

- Complete chain of custody and audit reporting

- Data immutability by default and detailed activities logging

- Cloud-based, WORM compliant storage

End User Search

Balancing employee expectations to have anytime, anywhere access to information with the need to enforce compliance and governance policies presents an on-going challenge for legal, compliance, and IT teams. Mimecast Cloud Archive offers the best of both worlds – intuitive desktop tools and mobile applications that let employees work smarter without sacrificing administrative control.

Key capabilities include:

- Rapid access to their complete archives – backed by the fastest search in the industry
- Instant access to all live and historical email when primary mail systems are unavailable
- Self-service security features, including spam and phishing reporting, managed sender lists, and hold queues

e-Discovery

In conjunction with Mimecast's compliance capabilities, Mimecast helps reduce exposure to legal threats through immutable archives, robust e-discovery, and defensible disposition. The solution's e-discovery capabilities are designed to both improve defensibility and reduce costs by providing:

- Comprehensive e-discovery and litigation support, including retention, legal hold, case management, and data export
- The industry's fastest service level agreement for search, delivering guaranteed search results across millions of records in seconds
- Centrally managed and rapidly deployed litigation holds
- Fast, effective case review with automated culling to significantly reduce third-party costs
- Self-service search and access for legal and compliance teams
- Rapid early case assessments

The True Cost

$18,000
The average e-discovery cost for one gigabyte of data is $18,000[1]

35%
A searchable record of knowledge that is integrated and inclusive can reduce the amount of time spent searching for internal information by up to 35%[2]

30,000
The average global organization faces 30,000 legal and regulatory record-keeping requirements[3]

Expanded Capabilities

Unlock the power of your information with a multi-purpose archive

Compliance & Supervision

Reduce the risk and complexity of navigating dynamic and regulatory requirements, while controlling audit readiness.

Compliance Protect

For compliance with financial services regulation SEC 17a-4, Mimecast Cloud Archive offers Compliance Protect, a set of capabilities, including immutability and a tamper proof environment, validated to meet this rigorous standard. Compliance Protect enables a minimum threshold period, providing immutability against accidental or malicious destruction of data, until that specified period is met.

Archive for Microsoft Teams

Decrease risk for the way your employees work today with security and compliance controls for Microsoft Teams.

Data Synchronization & Recovery

Ensure email data is never lost and rapidly restore inboxes to a point in time with archiving and data resilience capabilities that are managed from a single, easily searched Administration Console.

Data Migration

Reduce the time, cost, and complexity of shifting away from outdated archive systems by dramatically streamlining and accelerating the transfer of legacy data to Mimecast Cloud Archive.
