

Mimecast Sync & Recover

Why Microsoft 365 Isn't Good Enough

0

Zero

native backup or recovery flexibility for user data ... not a "true backup".

+
+

Complex Policies

are needed to protect from malicious attacks or accidental deletion, causing conflicts with corporate retention policies and risking non-compliance.

XX

End-users

can delete data, causing potential legal & compliance risks

The Need for Mimecast Sync & Recover

"Infrastructure and operations leaders using or evaluating Office 365 should consider investing in third-party tools for faster, more-flexible recovery options, as well as reputation damage control after a malicious attack."

- Gartner

Sync

- Transparent end-user experience
- Complete protection for email, calendar, tasks and contacts
- Tracks mailbox changes

Recover

- Granular recovery via folder or date range
- Point in time recovery
- Remediation and analysis
- No hardware required

The Bottom Line

Integrated Protection + Archiving

Simplifies & Automates Email Recovery

Enables Email Continuity & Resilience

Reduces Cost & Risk

Protects against malicious attacks, including Ransomware

Immutable backups prevent modifications
