How fierce is your security?

Stop bad things from happening to your organization with best-in-class security

Mimecast For Small Business

For companies with less than 100 employees

mimecast™

The cybersecurity landscape is complex – the security technology you rely on shouldn't be

Achieve the same level of security as companies many times your size – minus the excessive cost and crippling complexity. Trusted by more than 20,000 small businesses to close security gaps in Microsoft 365, Mimecast offers solutions that are proven effective, affordable, easy to deploy, and even easier to manage.

Get comprehensive coverage from the industry leader

Email is the top attack vector, but it's not the only way attackers get in. Get end-to-end coverage with a fully integrated suite that keeps email flowing, the web secure, your employees alert, and your organization protected.

Close gaps in Microsoft Office 365

Microsoft 365 is a world-class email service, but you need email security that's just as effective. Mimecast goes hand in hand with M365, closing security gaps and letting you reap the benefits of cloud email without increasing risk.

Ease the pressure on limited resources

Most small business owners do not have the time to manage complex technology. Mimecast removes the guess work with easy to deploy and manage security software that just works. Deploy what you need today and scale effortlessly as your business changes and grows. Our affordable plans help you secure up to 49 or 99 users for an annual flat fee, providing a predictable cost of ownership and most importantly, peace of mind.

How fierce is your security?

Mimecast For Small Business | CORE Plan
For companies with less than 100 employees

Close gaps in Microsoft 365 and build a strong security foundation

CORE provides market-leading protection for email, the number one attack vector. With CORE, you also get protection applied to your outbound email traffic and tools to stop the lateral spread of threats inside your network. The CORE plan layers in our award-winning awareness training, a video based system that makes your employees laugh while they learn, sharpening their security reflexes. The best part? CORE is affordable, easy to deploy, and even easier to manage.

What's Included

- Secure Email Gateway with Targeted Threat Protection

- Internal Email Protect

- Awareness Training

EMAIL SECURITY: PROTECTION AT AND WITHIN THE PERIMETER			
Secure Email Gateway with Targeted Threat Protection: Defend against the even the most sophisticated attacks types, control spam, and contain malware.	✓	✓	✓
Internal Email Protect: Prevent attacks from spreading internally between employees or externally to customers and partners. Automatically or manually remediate threats.	✓	✓	✓
Awareness Training: Make employees one of your greatest security assets, instead of the weakest link.	✓	✓	✓
RESILIENCE EXTENSIONS: ENHANCED CYBER RESILIENCE		✓	✓
Continuity: Keep email flowing no matter what.		✓	✓
Sync & Recover: Quickly and easily restore messages, files, or entire mailboxes – and make data loss a thing of the past.		✓	✓
Web Security: Let employees work safely online from anywhere and on any device. Monitor and control the use of unsanctioned, unsecure applications.		✓	✓
Large File Send: Easily and securely send large files up to 2GB.		✓	✓
Secure Messaging: Reduce the risk of data exposure by making it easy for employees to securely send sensitive or confidential information.		✓	✓
99-Year Archive: Simplify e-Discovery, case review, and end-user search, while ensuring data is never lost			✓
SUPPORT: LEGENDARY CUSTOMER SERVICE			
Included: 24x7x365 telephone support. Online access to Mimecast's Knowledge Base.	**Advanced**	**Advanced**	**Advanced**
