

For Small Business

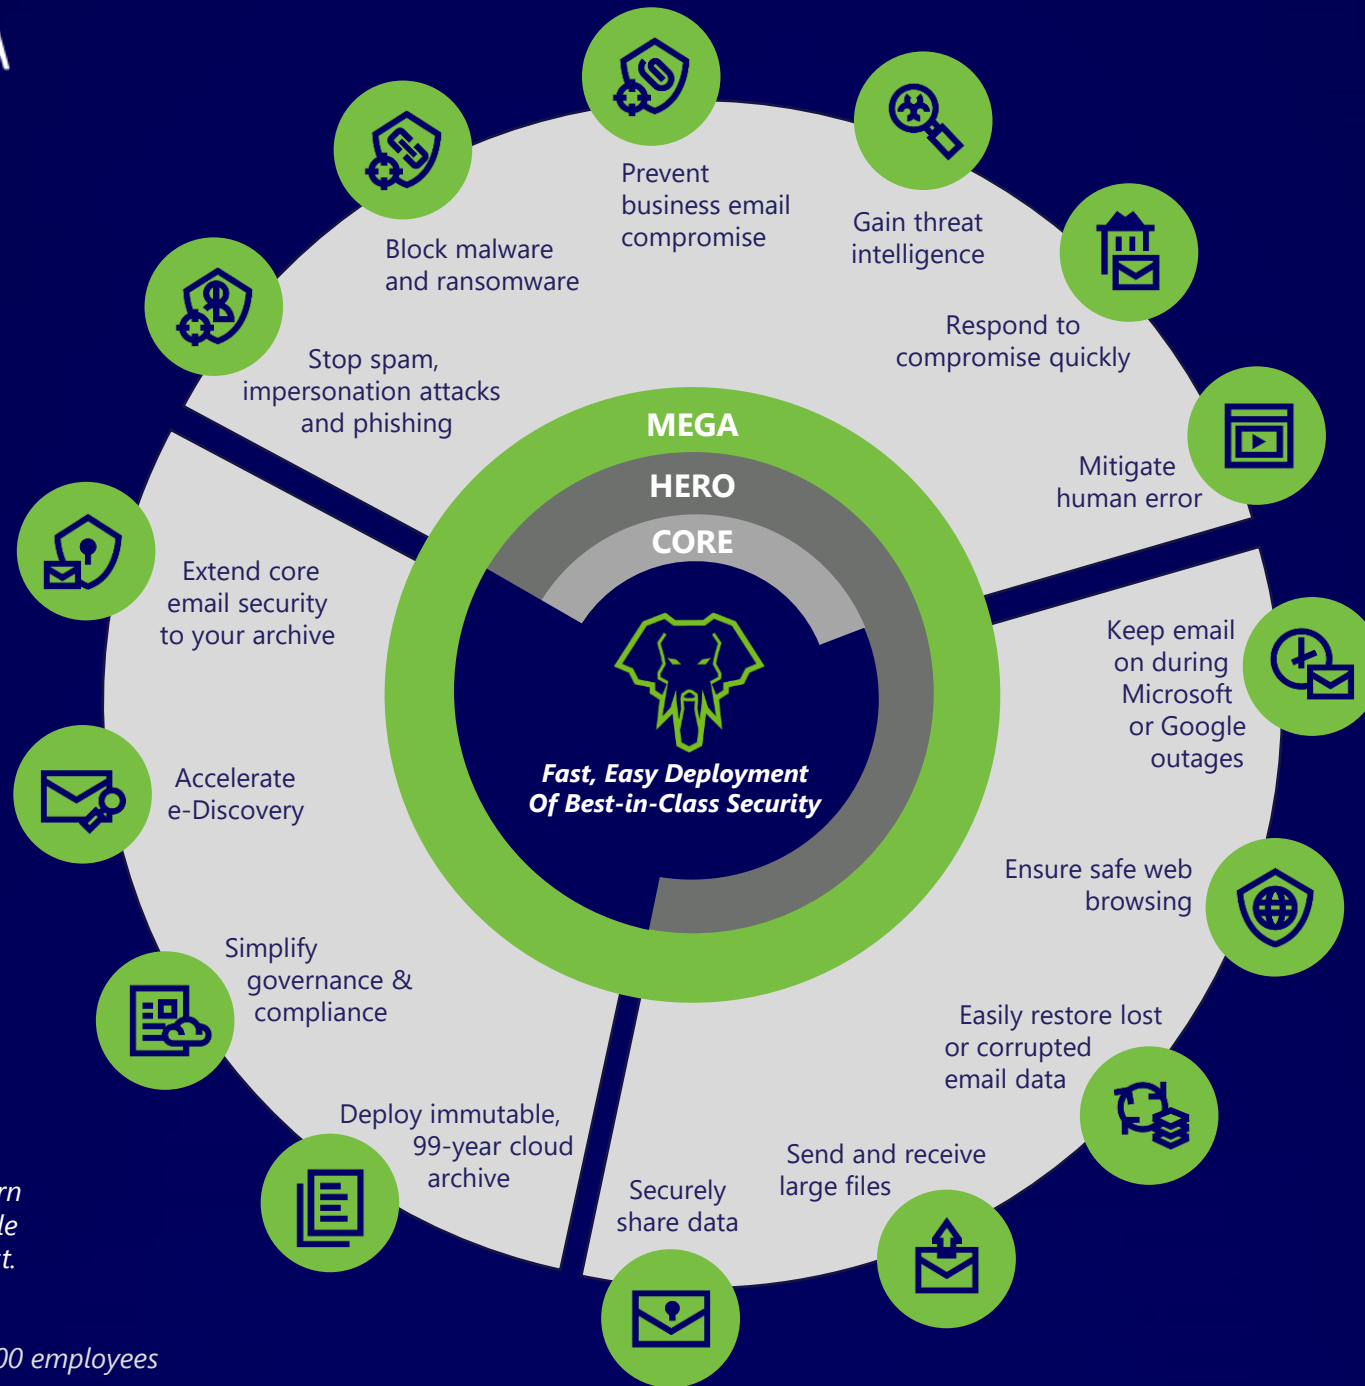

Mimecast is “must-have” security and archiving for companies that are serious about securing their data, protecting web browsing, and educating employees about cyber risk. The MEGA Plan provides affordable, easy to deploy, and easy to manage security, archiving, and resilience.

MEGA combines the 6X Gartner Magic Quadrant leading solution for Information Archiving and data recovery, industry leading email security, award winning security awareness training, and web security.

The result? Reduce the cost and complexity of data protection and compliance while also keeping your employees and customers safe and secure.

Talk to your trusted partner to learn how to secure your M365 or Google Workspace instance with Mimecast.
