

8 Data-driven Wins to Unlock Budget & Buy-in

Make the case for Human and AI Risk Management with real Mimecast results.

Already on AWS? Put your unspent commitment to work.

Mimecast is available on AWS Marketplace — no new budget cycle, no new procurement approval. Simplify billing and maximize your existing AWS investment.

Replace legacy tools and save big 01.

72% of organizations do not combine regular security awareness training with continuous monitoring – they’re running fragmented defenses against threats that can cost \$13.1M per month.

Detect ShadowAI 03.

86% of security leaders feared IP leaking from employees to GenAI tools. Platform-level visibility into developer activity stopped it early.

Expose hidden data exfiltration tactics 05.

64% of security pros struggled to identify data movement between personal and corporate domains. Spotting these patterns mitigate insider threats.

Avoid phishing risks 07.

75% reduction in successful phishing attempts – School District of Philadelphia achieved this through adaptive, risk-based training tailored to a diverse user base.

Flag risky employees 02.

3% of employees flagged for moonlighting, contract breaches, and data exposure — early identification saved millions in damages.

Prevent costly media leaks 04.

1 high-ranking executive stopped from leaking sensitive financial data via personal email. Early detection prevented reputational and financial fallout.

Reduce security team workload 06.

50%+ fewer daily security reports - Venable LLP dropped from 40–50 to just 10–20 per day, freeing the team to focus on higher-value work.

BONUS: Proven ROI 08.

255% return on investment over 3 years with Mimecast email security.
