

Mimecast Cloud Archive

Protect email and collaboration data with a robust, secure archive.

The Problem

Managing e-discovery and information governance has become increasingly challenging due to growing data volumes, evolving data landscapes, and the introduction of collaboration tools. Organizations face difficulties adhering to data retention requirements, supporting legal discovery, and maintaining regulatory compliance amidst decreasing budgets and limited resources.

The Solution

Mimecast Cloud Archive addresses these challenges by providing a highly secure and scalable data governance solution. It simplifies compliance, reduces the time and cost of e-discovery searches, and ensures data integrity with encrypted, tamper-resistant storage. The solution supports granular email retention policies and offers SLA-backed search capabilities from virtually any device, enhancing productivity and decision-making.

Mimecast Cloud Archive manages over
582 BILLION MESSAGES

3.2 MILLION Archive Searches Weekly
against the Mimecast Archive

76% of businesses experienced significant data loss, resulting in a **20%** decrease in customer trust and satisfaction*

Mimecast Value

- **Cut Costs and Complexity**
Reduces the cost and complexity of managing in-house legacy archives by offering a cloud-based solution.
- **Boost Productivity**
SLA-backed search capabilities allow employees to quickly find and use information, improving productivity.
- **Strengthen Compliance**
Provides granular litigation hold, near real-time e-discovery search, and reporting to support compliance needs.
- **Secure Data Retention**
Ensures secure and tamper-resistant retention of email and metadata, providing peace of mind.

Feature	Details
Next-Generation Archive	Built on a massively scalable cloud architecture, offering performance, scale, and cost savings.
Granular Retention Management	Supports legal and compliance needs with rapid search and preservation capabilities.
Integration with Messaging Platforms	Seamlessly integrates with Exchange, M365, and other platforms, simplifying administration and enhancing employee functionality.

How It Works

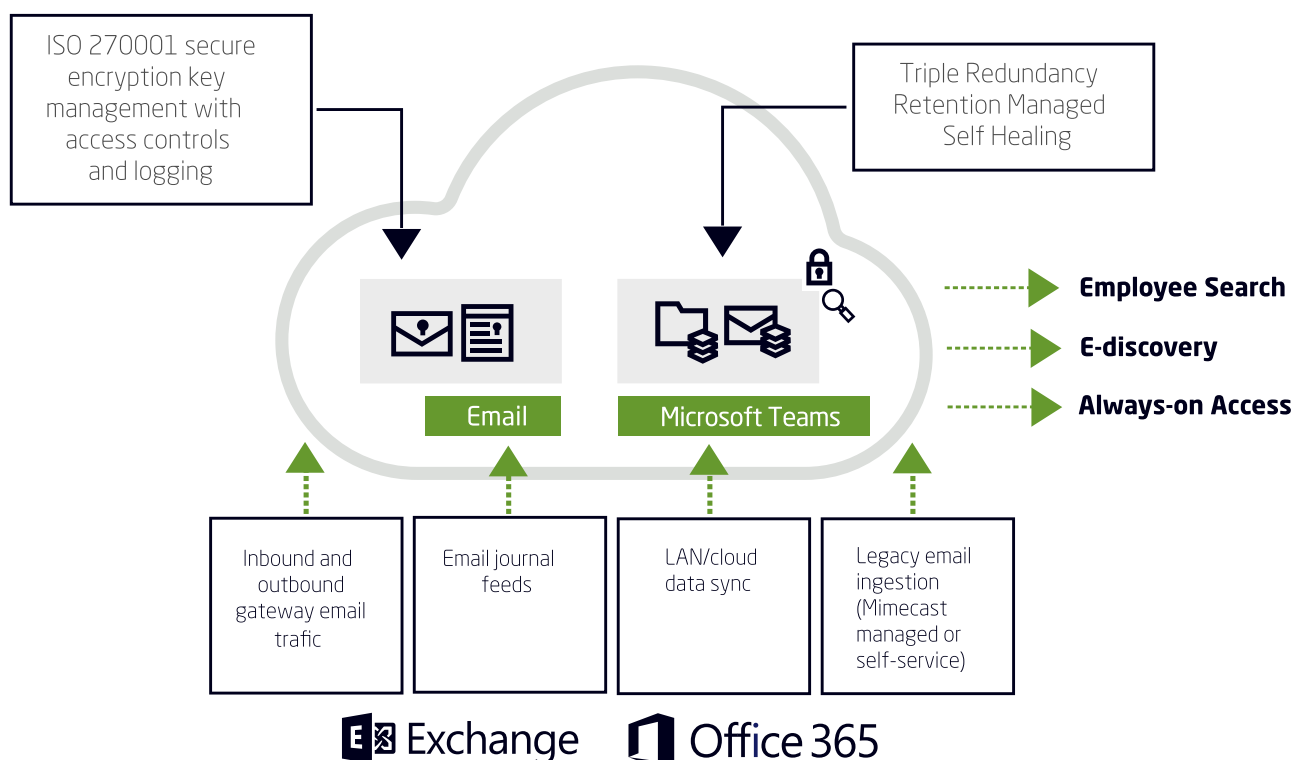

Data Capture: Inbound email and metadata are captured via the Mimecast Secure Email Gateway or journal streams.

Data Ingestion: Rapidly ingests data to consolidate legacy archives.

Data Storage: Stores archive data in triplicate across multiple geographically diverse data centers for resilience.

E-Discovery Tools: Provides rapid e-discovery search and case management tools for efficient data identification and assessment.

Employee Access: Allows employees to search personal archives from anywhere, even when primary systems are unavailable.

Key Benefits

Unified Management: Combines compliance archiving and data resiliency management.

Streamlined Configuration: Simplifies recovery and search processes.

Provides Multi-layered Defense: Protects against data loss from ransomware and other malware.

Reduces Administrative Complexity: Offers cloud-to-cloud backup with no hardware or software to manage.

Mimecast Cloud Archive Use Cases

eDiscovery and Legal Compliance

Mimecast Cloud Archive provides comprehensive e-discovery and litigation support, including legal hold and case management. This allows legal teams to efficiently search and retrieve necessary data, ensuring compliance with regulatory requirements and supporting legal processes.

Seamless Integration with Office 365

Mimecast Cloud Archive integrates seamlessly with Office 365, replacing traditional on-premise email management software. This integration simplifies data management and ensures that all email data is securely archived in the cloud.

Cost-Effective Data Management

Mimecast Cloud Archive offers predictable costs and eliminates the need for expensive hardware and software upgrades. This cloud-based solution provides a scalable and secure way to manage email archives, cutting down on operational expenses.

Improved Employee Productivity

With SLA-backed search capabilities, Mimecast Cloud Archive enables employees to rapidly search and access their personal archives from any device. This self-service access reduces reliance on IT support and enhances productivity by allowing employees to retrieve information instantly.

About Mimecast

Secure human risk with a unified platform.

Mimecast's connected human risk management platform prevents sophisticated threats that target human error. By gaining visibility into human risk across your collaboration landscape, you can protect your organization, safeguard critical data, and actively engage employees to reduce risk and enhance productivity.
