

# Sync & Recover

Email Protection and Recovery for Remote Workers

## WHY MICROSOFT OFFICE 365 ISN'T GOOD ENOUGH

**0** **Zero** native backup or recovery flexibility for user data ... not a “true backup”

**+** **Multiple Policies** are needed to protect from malicious attacks or accidental deletion, causing conflicts with corporate retention policies and risking non-compliance.

**↓** **End-user** restore is limited and requires IT involvement, impacting productivity.

## THE NEED FOR MIMECAST SYNC & RECOVER

“Infrastructure and operations leaders using or evaluating Office 365 should consider investing in third-party tools for faster, more-flexible recovery options, as well as reputation damage control after a malicious attack.” - GARTNER

**∞ Sync**

Transparent end-user experience  
Email, calendar, tasks, note and contacts are archived  
Tracks mailbox changes

**↻ Recover**

Granular recovery via folder or date range  
Restore to the desktop or mailbox  
Point in time recovery  
Remediation and analysis  
No hardware required

## THE BOTTOM LINE

Integrated Protection + Archiving

Simplifies & Automates Email Recovery

Reduces Cost & Risk

Enables Email Continuity & Resilience
